### **DETAILED ACTION**

Receipt is acknowledged of the Response filed 1/3/2007.

Claims 12-22 are considered to be the elected invention.

### **Claim Objections**

Claim 19 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### **Claim Rejections – 35 USC 112**

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-18 and 20-22 remain rejected under 35 U.S.C. 112, first paragraph, because of a scope of enablement issue. From a reading of the specifications, the applicant's scope of the term "capsule" should be limited to biocompatible polymer; the pharmaceutical composition should be defined as a pharmaceutical active agent; and the first and second end of the capsule must be smaller than the surface of the locking part. See the specifications, page 2, lines 25-30; page 4, lines 27-29; page 5, lines 1-4;

page 5, lines 10-11; page 6, lines 6-12; page 6, lines 15-20; page 6, lines 24-29.

These limitations as discussed in the specifications would show how the device works and how it is distinguished over the prior art, discussed in the specifications.

Applicant argues that the specification can be chosen freely and that the only restriction is that the surface of the locking part lowers the end of the locking part facing it. Applicant's arguments have been considered but are not persuasive for the following reasons: it is agreed that the specification is presumed to be enabling, the issue here is the scope of enablement. One skilled in the art would recognize the necessity for a biocompatible polymer and a pharmaceutically active agent. The specification at the above identified lines indicates how the article is produced. One of ordinary skill in the art, given the teachings disclosed in the specification would turn to these embodiments in order to practice this invention. Single limitations alone must be taken with the description and structure of the article as described in the specification. For the above reasons, that the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1621

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
